

Dear Sir / Madam,

We are proud to announce that our EHM / Eastman E-series vertical mast lifts have been nominated for product of the year in the category Scissor lifts / vertical mast lifts!

See the link here below :

<https://www.iapa-summit.info/awards.html>

The eventual winner will be announced on 6 March a.s. during the IPAF / IAPA awards ceremony in Dubai.

Our EHM E-series is the first and to date the only aerial platform that is fully electric for both driving / steering but also for lifting and lowering. This mast lift is therefore free of (hydraulic) oil and is therefore very suitable for use in cleanrooms, the food industry and related industries.

This EHM mast lift is also available in standard version (M-series) and this lift and lowers hydraulically but drives / steers electrically (direct drive).

Furthermore, these EHM mast lifts are known for their compactness, maneuverability (zero turning radius), low own weight and last but not least, their robustness.

On the Vertikal Days which will be held on 15 and 16 May in Donington Park, Castle Donington, Derby, DE74 2RN in the UK, this platform will be officially introduced for the first time after being admired at the Vertikal Days in Gorinchem (the Netherlands) at the European public.

For more information about this exhibition see www.vertikaldays.net.

For more information about our EHM aerial platforms you can also visit our site fontexx.com or feel free to contact us via email info@fontexx.com or you can also just call us +31 (0) 497 726 926.

Our employees are happy to answer all your questions.
